

Senior React Native Engineer

Hux is an online marketplace where you can instantly book a local service provider. Like Airbnb, you can compare local service providers on reviews, total price, pictures, availability and instantly book an appointment online. Currently focused on house cleaning, Hux will expand into a wide-variety of services in the future. Hux is venture funded by Tim Draper (Silicon Valley) and Dau Group (Atlanta). We are looking for a Senior React Native Engineer to lead our mobile efforts.

The Position

As a Senior React Native Engineer for Hux, you will...

1. Build our first ever React Native app and be the go-to person for best practices
2. Be a founding member of our mobile department

You Are

Ambitious – You want real responsibility that moves the needle.

Creative – You are able to find the best solution without direction.

Perfectionist – No messy code or confusing interfaces. Every pixel gets your fullest attention.

Organized – You are skilled at planning, organizing, prioritizing and executing simultaneous projects. You can prioritize tasks by their impact on the bottom line and keep complicated projects in motion.

Composed – You are self aware and well spoken. You handle emergencies with grace and composure.

Data-Driven – You argue it's not right unless you can prove it with numbers.

A Closer – No excuses, just results.

Requirements

- 3+ years experience developing responsive web applications that work across multiple devices
- 1+ years experience with React Native development
- Familiarity with Pub/Sub and distributed data
- Understanding of the web technology stack (HTTP, WebSockets, asset loading / caching)
- Located in or able to move to Atlanta, GA

Perks

- Free Hux services
- Opportunity to work with the founding team as we shape the strategic direction of the company
- Enthusiastic and motivated team at a cool office in Midtown

Benefits

- Competitive salary
- Stock Options
- Health, dental and vision insurance
